SHUFFLE!

▼ Grid.vue example2/src/components

```
1  <template lang="pug">
2    div
3      transition-group.container(tag='ul')
4        li(v-for='n in list', :key='n', :class='`item item-${n}`') {{n}}
5        button(@click='shuffleList') Shuffle!
6  </template>
7
8  <script>
9    import shuffle from 'lodash/shuffle'
10
11    export default {
12      data () {
13        return {
14          list: [1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12]
15        }
16      },
17
18      methods: {
19        shuffleList () {
20          this.list = shuffle(this.list)
21        }
22      }
23    }
24  </script>
```

```
.item {  
  display: flex;  
  justify-content: center;  
  color: white;  
  font-size: 60px;  
  font-family: Helvetica, sans-serif;  
  text-align: center;  
  align-items: center;  
  transition: transform 1s cubic-bezier(0.4, 0, 0.2, 1);  
  height: 177px;  
}
```

SHUFFLE!

Exercise

#05

We'll cover that in the next topic!

cards shifting when unsealing card,

Implementation transitions when:

• Seleccioning/unseleccioning a project card

• Shuffling the list

Don't worry about the background
